An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the specification, prior to line 1, -- This application claims the benefit of U.S. Provisional Application Serial No. 60/433,212, filed December 13, 2002. - has been inserted.

The following is an examiner's statement of reasons for allowance: The recitation of a liquid conditioning system comprising a separator in communication with a holding tank whereby a second liquid collects on the surface of an immiscible first liquid, and a sump, with a venturi pump having a first inlet connected to the outlet of the sump, a second inlet communicating with a pump in the holding tank, and an outlet in communication with the inlet of the separator patentably distinguishes over the prior art of record.

Zenner, Galletti, Bottomley, Fortier, Favret, Fink, Lewandowski, Battenand Portman each disclose various combinations of a separator for separating immiscible liquids with a holding tank and/or a sump, but none disclose the use of a venturi pump having a first inlet connected to the outlet of the sump, a second inlet communicating with a pump in communication with the holding tank, and an outlet in communication with the inlet of the separator.

Prior art venturi pumps in combination with separators are exemplified by Petretti and Batten. In these references, the venturi pump is used to move solids containing liquid to or within a separator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

A handwritten signature in black ink, appearing to be 'CU' followed by a stylized flourish.
